About Me

I consider myself a computational mathematician and my research interests lie in wielding math to design algorithms for real-world problems. I practice that in developing scalable algorithms to quantify, analyze, and control the uncertainty inherent in mathematical models. During my Ph.D., I focused on the uncertainty quantification (UQ) of large-scale inverse problems for physical phenomena governed by partial differential equations (PDEs). At the moment, I'm pursuing new directions in computational math, via problem structure-exploiting neural architectures, uncertainty quantification, randomized algorithms, among more.

Education

- | | |
|---|---------------------|
| North Carolina State University , PhD in Applied Mathematics – Raleigh, NC | Aug 2020 – May 2025 |
| • Recipient of the Siewert Fellowship | |
| New York University , BA in Mathematics, Computer Science – New York, NY | May 2016 – May 2020 |
| • Minor in Classics | |

Experience

- | | |
|---|---------------------|
| Postdoctoral Visiting Scholar , ICERM, Brown University – Providence, RI, USA | Jan 2026 – Apr 2026 |
| Postdoctoral Researcher , Tufts University – Somerville, MA, USA | June 2025 – Present |
| • Working with Elizabeth Newman in structure-exploiting SciML and uncertainty quantification. | |
| Givens Intern , Argonne National Laboratory – Lemont, IL, USA | May 2024 – Aug 2024 |
| Givens Intern , Argonne National Laboratory – Lemont, IL, USA | May 2023 – Aug 2023 |
| • Became a core maintainer of the PyOED project and published a peer reviewed paper in TOMS. | |
| • Published novel research in Robust Optimal Experimental Design, in review at SIAM CSE. | |
| • Under the mentorship under Ahmed Attia . | |
| Research Assistant , North Carolina State University – Raleigh, NC | June 2021 – Present |
| • Published novel research in scalable UQ for infinite-dimensional Bayesian inverse problems. | |
| • Research Assistant for Alen Alexanderian via NSF Grant DMS-2111044. | |
| Teaching Assistant , North Carolina State University – Raleigh, NC | |
| • Led recitations for Calculus I, II, and the honors variants for 5 semesters. | |
| Undergraduate Research Assistant , Ohio State University – Athens, OH | May 2019 – Aug 2019 |
| • Published novel research in the theory of pattern formation, for the 2D Swift-Hohenberg Equation. | |

Publications

- | | |
|--|----------|
| Exploiting Exact Conditionals Improves Conditioning: Provably Fast Mixing Time Bounds By Sampling from the Marginal | Aug 2026 |
| <i>Abhijit Chowdhary</i> , Federica Milinanni, Julianne Chung, Elizabeth Newman | |
| https://doi.org/10.48550/arXiv.2608.27884 (arXiv preprint) | |

Boost Like a (Var)Pro: Trust-Region Gradient Boosting via Variable Projection <i>Abhijit Chowdhary</i> , Elizabeth Newman, Deepanshu Verma https://doi.org/10.48550/arXiv.2603.23658 (arXiv preprint)	Mar 2026
Scalable Uncertainty Quantification for Infinite-Dimensional Bayesian Inverse Problems <i>Abhijit Chowdhary</i> www.lib.ncsu.edu/resolver/1840.20/45106 (PhD Thesis, NC State University)	Feb 2025
Robust optimal design of large-scale Bayesian nonlinear inverse problems <i>Abhijit Chowdhary</i> , Ahmed Attia, Alen Alexanderian https://doi.org/10.48550/arXiv.2409.09137 (SIAM Journal on Scientific Computing)	Sept 2024
PyOED: An Extensible Suite for Data Assimilation and Model-Constrained Optimal Design of Experiments <i>Abhijit Chowdhary</i> , Shady E. Ahmed, Ahmed Attia https://dl.acm.org/doi/10.1145/3653071 (ACM Transactions on Mathematical Software)	June 2024
Sensitivity Analysis of the Information Gain in Infinite-Dimensional Bayesian Linear Inverse Problems <i>Abhijit Chowdhary</i> , Shanyin Tong, Georg Stadler, Alen Alexanderian https://doi.org/10.1615/Int.J.UncertaintyQuantification.2024051416 (IJUQ)	May 2024
Weak Diffusive Stability of Roll Solutions at the Zigzag Boundary <i>Abhijit Chowdhary</i> , Mason Haberle, William Ofori-atta, Qilian Wu https://doi.org/10.1137/24M1639683 (SIAM Journal of Mathematical Analysis)	Oct 2023

Software

PyOED	May 2023 – Present
• Core maintainer of PyOED, an open source research software for model-constrained optimal design. • Designed to extend and integrate existing codes to rapidly test new developments. • Used in multiple research groups worldwide.	

Talks

VPBoost: Variable Projection for Gradient Boosting and VarProNets	Dec 2025 – Present
• WCCM–ECCOMAS 2026, Munich, Germany (Jul 2026). • CMO Integrating Data- and Physics-Driven Methods for Decision Making under Uncertainty, Oaxaca, MX (June 2026) • SIAM UQ 2026, Minneapolis, MN (Mar 2026). • ICERM, Providence, RI (Feb 2026). • CBMS Conference, University of Houston, Houston, TX (Dec 2025).	
Robust Optimal Experimental Design for Large-Scale Bayesian Inverse Problems	May 2023 – Mar 2025
• SIAM CSE 2025, Fort Worth, TX (Mar 2025). • Applied Math Graduate Student Seminar, Raleigh, NC (Nov 2024). • SIAM MDS 2024, Atlanta, GA (Oct 2024). • SASSy Seminar, Argonne National Laboratory (May 2023).	
PyOED for Bayesian Optimal Experimental Design	Feb 2024 – Aug 2024
• SASSy Seminar, Argonne National Laboratory (Aug 2024). • SIAM UQ 2024, Trieste, Italy (Feb 2024).	

Sensitivity Analysis and Scalable Optimal Design for Bayesian Inference

Apr 2022 – Aug 2023

- Applied Math Graduate Student Seminar, Raleigh, NC (Aug 2023).
- SIAM CSE 2023, Amsterdam, Netherlands (Mar 2023).
- Applied Math Graduate Student Seminar, Raleigh, NC (Apr and Sept 2022).

Service

Group Leader, VERSEIM-REU

June 2026 – Aug 2026

- Leading a research group of undergraduates alongside [Elizabeth Newman](#).

Co-Organizer, Postdoctoral and Graduate Student Seminar, ICERM

Jan 2026 – Apr 2026

Lead Organizer, Applied Math Graduate Student Seminar (AMGSS), NCSU

Jan 2022 – May 2025

Peer-Review for the following journals.

- Journal of Open Source Software (JOSS)
- SIAM Journal on Matrix Analysis and Applications (SIMAX)
- SIAM Journal on Uncertainty Quantification (JUQ)

Skills

Programming: Proficient in Python, Julia, C, C++, MATLAB, and Shell Scripting

Technologies: Generally familiar with the GPU programming interfaces, the machine learning stacks, Finite element software, high-performance linear algebra, and Linux.

Mathematics: Specialized in scientific computing, uncertainty quantification, and large-scale optimization. Theoretical foundations in the PDE, probability, and functional analysis.

Languages: English (native), Latin, Hindi
